Foreign Currency Savings Deposits

I confirm that I understand that:

OUnlike regular yen deposits, foreign currency savings deposits are not covered by deposit insurance.

OThere is a risk of capital loss when my deposit is withdrawn and is converted back to Japanese yen, due to fluctuations in the exchange rates.

OForeign currency savings deposits may fall below my original investment amount even if there is no currency fluctuation, due to the difference between TTS

rate (Exchange rate quote from yen to foreign currency) and TTB rate (Exchange rate quote from foreign currency to yen), which are designated by the Bank.

I have carefully read, understood, and confirmed the "Product Description of Foreign Currency Deposits to be confirmed prior to concluding the Customer Agreement on Foreign Currency Savings Deposit for PowerFlex Account". Therefore the "Product Description of Foreign Currency Deposits to be confirmed at the time of concluding the Customer Agreement on Foreign Currency Savings Deposit for PowerFlex Account" is not necessary for me to be given.

Account Management Fees

I acknowledge that SBI Shinsei Bank will automatically deduct payment for the account management fees in accordance with the Bank's terms and conditions. <Account management fees are currently waived.>

Handling of Personal Information of Individual Customers

In accordance with the Act on the Protection of Personal Information (Act No. 57, May 30, 2003) and the Act on the Use of Numbers to Identify a Specific Individual in the Administrative Procedure (Act No. 27, May 31, 2013), the Bank shall use collected customers' "personal information and 'social security and tax numbers' ("Individual Numbers")" (collectively, "Personal Information") for the following operations within the scope required to achieve the following purpose of use. The Bank shall stipulate the purpose of use specifically for customers' clear understanding of the purpose. For instance, when the Bank asks customers to answer questionnaires, the Bank shall endeavor to limit the purpose of use (e.g., to count and organize questionnaire results) according to the situation.

Product Description of Foreign Currency Deposits to be confirmed prior to concluding

the Customer Agreement on Foreign Currency Savings Deposit for PowerFlex Account

(This is the document to be delivered based on the laws and ordinances before concluding the forementioned Agreement, and doubles as the product description of foreign currency deposits, etc.)

Please read this document carefully.

Characteristic of Foreign Currency Savings Deposit for PowerFlex Account:

- This deposit is a foreign currency savings deposit. Foreign currency savings deposit is defined as a deposit in foreign currency (currencies other than yen) whose term or maturity is not specified.
- For deposit currency, there is a choice among US dollar, Euro, Australian dollar, New Zealand dollar, and other currencies designated by SBI Shinsei Bank (hereinafter referred to as "the Bank").
- Deposit in foreign currency cash is not accepted. Withdrawal in foreign currency cash is not accepted at the Bank branches, provided however, that the Bank accepts foreign currency cash withdrawal in the way prescribed by the Bank.

Matters to be noted:

Foreign currency deposits entail the risk of foreign exchange rate fluctuation. When a customer places a deposit by exchanging yen into a foreign currency, the customer may incur exchange losses - in terms of yen - depending on the trends in the foreign exchange market, with the result that the funds to be repaid - when translated into yen using the exchange rate as of the repayment date - would be smaller than the yen amount initially deposited.

When a customer places a deposit in a foreign currency, and converts the deposit into another currency eligible for a direct non-JPY cross currency exchange, the customer may suffer exchange losses - in terms of the initially deposited currency - depending on the trends in the foreign exchange market, with the result that the funds to be repaid - when translated into the initially deposited currency using the exchange rate as of the repayment date - would be smaller than the initially deposited currency amount.

Fees and charges:

- When a customer starts a foreign currency deposit in yen, the Bank-designated telegraphic transfer selling rate (TTS rate) which includes foreign exchange fee will apply to exchange a yen original investment to a foreign currency deposit principal. Then, the Bank-designated telegraphic transfer buying rate (TTB rate) which includes foreign exchange fee will apply to exchange withdrawal or interest amount from a foreign currency to yen. Therefore, there is a risk of principal less than the original investment even if foreign exchange rates do not fluctuate.
- ◆ A customer is allowed to switch a foreign currency deposited with a foreign currency savings account to another foreign currency, however, provided that those foreign currencies shall be currencies eligible for a direct non-JPY cross currency exchange. The Bank-designated foreign exchange rate which includes foreign exchange fee will apply when switching a currency. Therefore, there is a risk of principal less than the original investment.
- Foreign exchange fee depends on a pair of currencies. For details, refer to the after- mentioned "Fees and Charges relating to Foreign Currency Deposits".

Risk of principal less than the original investment due to exchange rate fluctuation:

- When a customer places a deposit by exchanging yen into a foreign currency, the customer may incur exchange losses in terms of yen depending on the trends in the foreign exchange market, with the result that the funds to be repaid when translated into yen using the exchange rate as of the repayment date would be smaller than the yen amount initially deposited.
- When a customer places a deposit in a foreign currency, and converts the deposit into another currency (provided, however, that such currency is limited to those handled by the Bank), the customer may suffer exchange losses in terms of the initially deposited currency depending on the trends in the foreign exchange market, with the result that the funds to be repaid when translated into the initially deposited

currency using the exchange rate as of the repayment date - would be smaller than the initially deposited currency amount.
